Pietra Grey and White Crystal

The gorgeous Pietra Grey can go with every other choice of natural stone. As we see in this picture, designer has combined it with grey marbles or Travertines on the floor and a stunning bookmatch of Pietra Grey, and also a touch of white crystalline marble of our land on the rest of the wall. This combination has created a gorgeous warm look.

A modern living room with a wall of Crystalline Marbles. The wall is composed of large, rectangular panels of marble with white, grey, and black veining. A television is mounted on the wall, displaying a scene from a movie. Below the television is a fireplace with a fire burning. The room is furnished with a dark brown sofa, a matching ottoman, and several armchairs. A large, dark, dome-shaped pendant light hangs over a dining table in the background. The lighting is warm and ambient, with track lighting on the ceiling and a lamp on a side table.

Crystalline Marbles

We have a great source of Crystalline Marbles. They have white, grey – from light to dark – and black backgrounds with grey, white and black veins and clouds. We can find super white crystalline marbles and the go darker and darker .
